Experience

Our Property NG

Front End Developer

Ibadan, Nigeria

08/2024 - 01/2025

- Played a pivotal role in developing property management software for real estate companies, streamlining the management of landlords, tenants, staff, properties, and financial transactions.
- Collaborated with the backend team to integrate a secure wallet system, facilitating transactions between users, company wallets, and landlords.
- Successfully integrated complex APIs with multiple filters, search, and sort functionalities, ensuring robust error handling and user notifications for both successful and failed actions.
- Converted 30+ Figma design pages into responsive and functional code with NextJS.
- Managed the integration of company onboarding and setup processes, streamlining the initial configuration for new companies and ensuring a smooth transition to the app.
- Enhanced the customization features of the web app, enabling companies to personalize brand colors, navigation bar placement, and theme settings for a tailored user experience.

233Developers Inc

Front End Developer

Remote, Ghana

06/2023 - 03/2024

- Completed the development of a React web app to facilitate user management and administrative operations for a dating mobile app with over 6000 users.
- Integrated a customer support feature within the aforementioned web app incorporating real-time messaging capabilities.
- Implemented error handling mechanisms during API communication, providing immediate visual feedback for any failures.
- Engineered an activity timeline feature to track admin actions, encompassing login events, user bans, password changes, and support ticket management activities; facilitated in-depth audit trails for admin operations.
- Ensured screen reader compliance, cross-browser functionality, and accessibility for users with disabilities by utilizing proper HTML semantics, managing tab indexes precisely, and implementing ARIA roles and properties; enhanced user experience and inclusivity for all users.

SiNet Technologies (Seconded to Oando PLC)

Software Developer Intern

Victoria Island, Lagos

03/2023 - 05/2023

- Created REST APIs with detailed documentation using Postman and Swagger UI, incorporating role-based access controls.
- Crafted database schema for a SaaS platform using MongoDB Aggregation Pipelines, enhancing system scalability.
- Revamped content generation and rendering using EJS templates, streamlining client-side data processing in a task manager app.
- Deployed and maintained web servers using Node.js and Express, handling multiple concurrent users.
- Learned to develop Progressive Web Applications (PWAs) within 1 month, demonstrating rapid skill acquisition.

Projects

Property Manager

<https://beta.coolify.ourproperty.ng/>

08/2024 - 01/2025

Played a key role in implementing secure authentication, integrating a wallet system, developing responsive designs, and ensuring efficient API interactions

Outingz Admin Portal

<https://outingz.vercel.app/>

06/2024 - 07/2024

An Admin Portal for managing events, promoters, and transactions.

Demo login: onos@event.com, **password:** Secret1@

Kanban Task Manager App

<https://kanban-app-yagz.onrender.com>

03/2023 - 04/2023

A full-stack task management app built with React, TypeScript, Node.js, Express, and MongoDB. **Demo login:** demo@example.com, **password:**

123456. Key features include:

- Drag and drop functionality for task cards and columns.
- Task assignment to team members via email addresses with integrated notifications.
- Real-time task status tracking to enhance transparency and collaboration.
- Light and dark mode for customizable user experience.
